Introduction

Why Amari?

1. No idea
2. Seriously, run

Why Amari?

- ❏ Seriously, it's worthless
- ❏ This can't even do sections and subsections properly without a custom function (fumi and subfumi, because author is a weeb)

Conclusions

Closing Thoughts

- ❏ Yay, Beamer!
- ❏ The layout is a bit based on Execushares, just a bit (I took their bullet points and footer)

This one is a full frame!

A full-frame photograph of the Illinois State Capitol building at dusk. The building is a large, classical structure with a prominent dome and many windows, some of which are illuminated. In the foreground, there is a busy street intersection with traffic lights, a black car, and several people, including a cyclist and pedestrians. The sky is dark, and the overall scene is dimly lit, suggesting twilight. The text "This one is a full frame with an image in the background" is overlaid in white across the middle of the image.
